

# Steelhead ROV

The **Steelhead** inspection-class ROV is a portable, lightweight and stable underwater system that is easily operated through intuitive flight controls. Its small profile allows this vehicle to inspect confined spaces and be easily stowed.

The compact **Steelhead** is easily deployed and recovered from small vessels and docks - no need for hoists or cranes. A standard definition NTSC/PAL camera, optimized for lowlight conditions provides the ROV operator with quality video. "Out of the box" features include an integrated controller and LCD monitor module with auto depth, auto heading, a digital video recorder and much more.

## FEATURES

- Intuitive controller
- Broadcast-quality colour, zoom camera
- Variable speed & directional ROV control
- Integrated controller with LCD monitor
- Digital Video Recorder (DVR)
- Manual and automatic camera focus control
- Depth-rated to 300 m (1000 ft)
- Auto depth, auto heading functions
- Four (4) powerful thrusters
- Leak detection warning system
- Tether-launchable
